TLISS00210

Supervise Compliance with Fuel Storage and Dispensing Site Requirements Skill Set

This course is suitable for contractors who are responsible for managing or participating in the compliance requirements whilst working on a fuel storage and dispensing site.

What to expect

This course contains online learning, reading and research activities, videos, on the job training, logbook, multiple choice questions, case studies, video demonstrations, supervisor reports and assignments

Course delivery

This course is offered via online training and can be completed in a home or work/office environment at learners own pace and with your supervisor on the job in a fuel storage and dispensing environment.

Prerequisites

Learners must be over 18 years of age to study with ACAPMA.

Must currently work within the fuel industry and can provide a letter of support and mentoring from your manager which includes fuel site access and appropriate tools and equipment (including PPE) to safely complete work undertaken (see application pack)

Have at least to 2 years experience and/or training in your area of expertise such as electrical work, joiner, fitter, etc

Have and provide a current completed WPCG Clearance Course or ACAPMA Fuel Work Hazard Awareness Webinar and have access to a computer with sound and a mobile phone with video capability

What is a Skill Set?

Skill sets are a grouping of one or more competencies below the level of a full qualification that meet a client **skills** need, such as a licensing or compliance requirement or specific knowledge in an emerging area.
